

Simplest and fastest installation on the market

Thanks to our patented 60 seconds per post anchoring system.

Aluminum quality

All our aluminum parts are chromate washed, prior powder coating to warranty many corrosion free years.

Customizable

A nineteen module variety allows the designer to create a unique railing for each application.

Luxury

Our signature railing radiates luxury and has the option of a rich Teak, Birch or Mahogany top.

Who We Are

The Signature Residential railing system is the flagship handrail of our company. It radiates luxury and can be topped with a rich Teak wood top. The most striking visual property of the Signature is it doesn't show any bracket, nor fastener, giving it an extremely clean look.

The well designed chamfered 4-inch square posts are anchored within 60 seconds, due to the patented 'Ebus Bolt'.

This system is mechanically assembled, and the easiest and fastest system available on the market. This eliminates the need for welding equipment, abrasive cleaning and powder coating.

Besides the ease of assembly, our dealers can install the product within days after the client signs the contract.

The Signature system accepts a highly customizable variety of 19 modules, making it desired by architects and designers.

The 6063-T5 alloy is made of the best quality aluminum. Our profiles are chromate washed against beachfront corrosion, and a durable coating that is typically twice as thick as other types of paints and meets AAMA 2604 Standards. No maintenance, bending, warping nor discoloration will occur. Our choices of Dupont woodgrain tops are warranted for 20 years against UV exposure.

A) Screw pickets to snaps

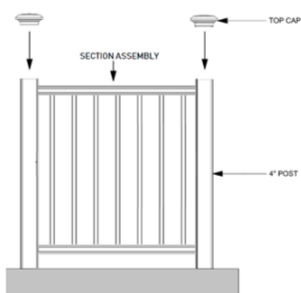

B) Snap Top & Bottom Bars onto Picket Assembly A)

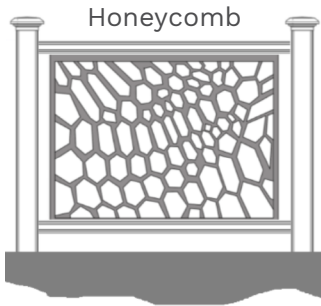

C) Screw Slide In Panels onto Section Assembly

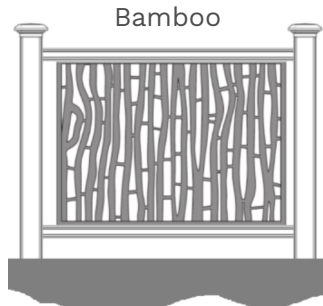

E) Finish Off By Adding Post Caps

Honeycomb

Bamboo

Honeycomb and Bamboo

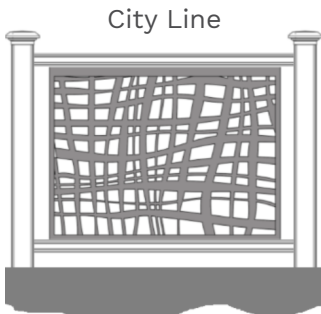

- The Signature Railing system offers eight ¼" aluminium water jetted design panels. Each of the panels are designer to be applied in a continued pattern.
- Besides railings, the panels can be used elsewhere on the same house or building as an architectural feature.
- The architect or designer can special order any other custom design.
- The 6063 – T5 aluminium panels are chromate washed and powder coated, and can withstand any exposure to the elements.

Standard Pickets

- For the standard Pickets designs, the Signature system offers a choice of 3 different pickets.
- Shamfered, square and round.
- An intermediate horizontal 2" x 1" bar or a 3" x 2" bar can be added 4 inches below the top bar.
- Remark: The Signature system is modular, allowing the designer to mix & match pickets with other modules available.
- This allows for countless design options.

Standard pickets

City Line

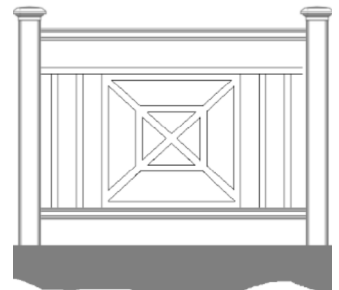

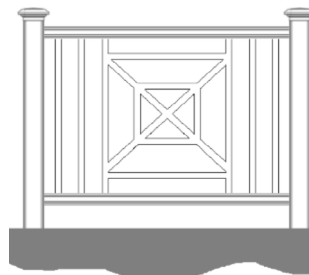

Palm Bay

City Line and Palm Bay

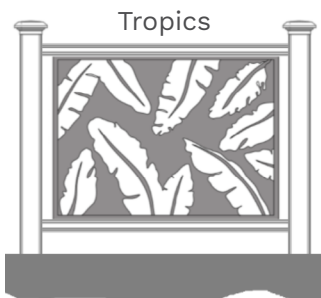

- The Signature Railing system offers eight ¼" aluminium water jetted design panels. Each of the panels are designer to be applied in a continued pattern.
- Besides railings, the panels can be used elsewhere on the same house or building as an architectural feature.
- The architect or designer can special order any other custom design.
- The 6063 – T5 aluminium panels are chromate washed and powder coated, and can withstand any exposure to the elements.

Union Jack

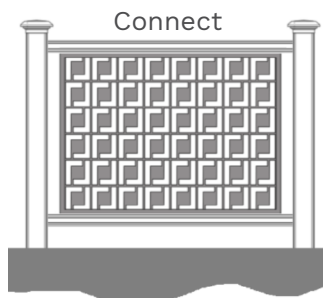

- The union jack module is used to create the colonial and historical look.
- Widely used in the southern States, and the Caribbean Islands.
- Like the standard pickets, the Signature system allows for a 2" x 1" intermediate bar 4" apart from the top bar.
- This module is mostly combined with standard pickets.
- This module is exactly 26" wide.

Tropics

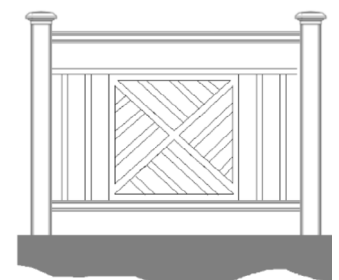

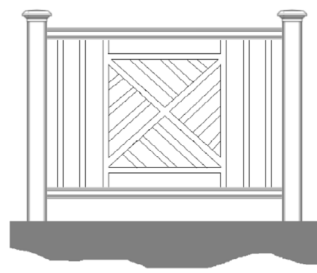

Connect

Tropics and Connect

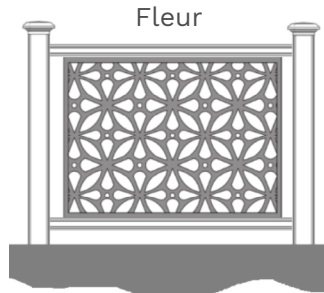

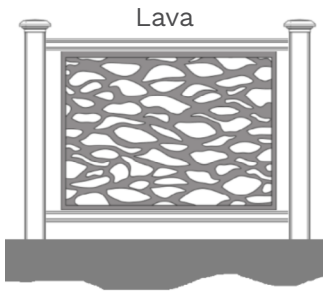

- The Signature Railing system offers eight ¼" aluminium water jetted design panels. Each of the panels are designer to be applied in a continued pattern.
- Besides railings, the panels can be used elsewhere on the same house or building as an architectural feature.
- The architect or designer can special order any other custom design.
- The 6063 – T5 aluminium panels are chromate washed and powder coated, and can withstand any exposure to the elements.

Zig-Zag Module

- The Zig-Zag module is used to create the colonial and historical look.
- Widely used in the Southern States, and the Caribbean Island.
- Like the standard pickets, the Signature system allows for a 2" x 1" intermediate bar 4" apart from the top bar.
- This module is mostly combined with standard pickets.
- This module is exactly 26" wide.

Zig-Zag

Lava and Fleur

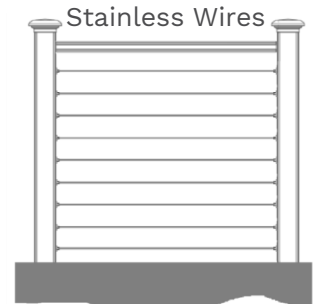

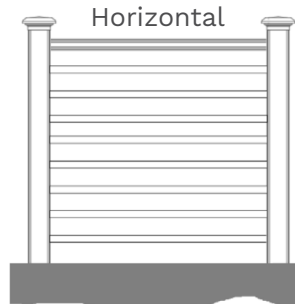

- The Signature Railing system offers eight ¼" aluminium water jetted design panels. Each of the panels are designer to be applied in a continued pattern.
- Besides railings, the panels can be used elsewhere on the same house or building as an architectural feature.
- The architect or designer can special order any other custom design.
- The 6063 – T5 aluminium panels are chromate washed and powder coated, and can withstand any exposure to the elements.

Horizontal Design

The Signature system offers two horizontal contemporary design options. Using 2" x 1" bars diameter, spaced 4" apart, creates the modern look many designers are looking for

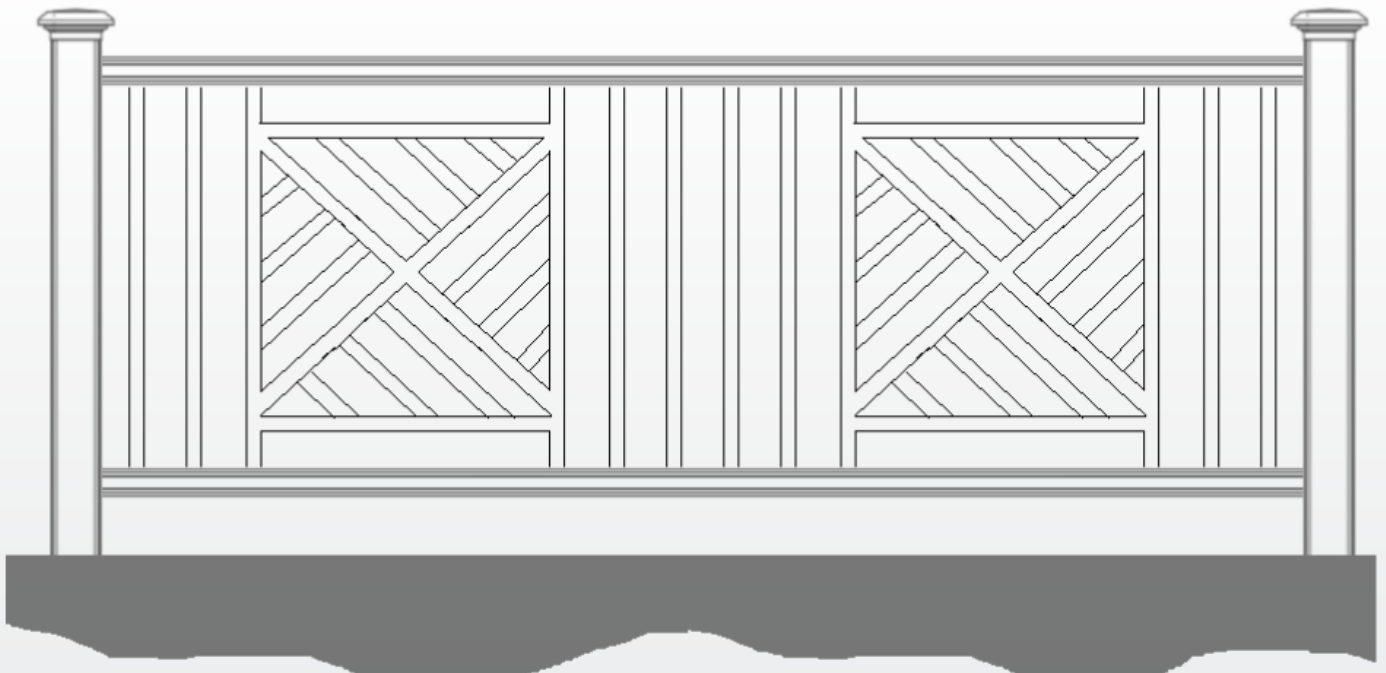

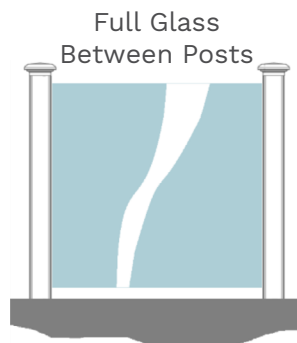

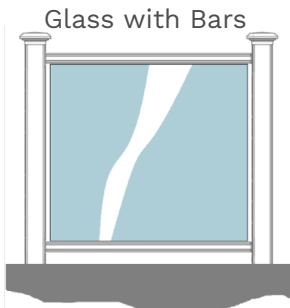

Or

Stainless steel cable 3/16" in diameter, preventing the railing taking away a breathtaking view from the balcony

Full Glass

- The signature system offers the options to use tempered laminated glass panels to be installed at record braking speeds.
- The glass panels can be either installed with or without a top bar.
